//

Welcome to Seoul Digital University, the Center of cutting-edge Online Education.

//

Education Foundation,
Seoul Digital University

Chairman Jeong Soon Taek

—

Superintendent of Education, Busan City

Presidential Secretary for Education Culture
of Cheongwadae

Busan International Foreign Language
High School Principal

We sincerely welcome you to Seoul Digital University, the center of cutting-edge online education launched in the age of knowledge information society and globalization.

As our society changes rapidly, the role and usefulness of practical knowledge is growing. In order to adapt to these societies and to be ahead, we cannot ignore the currents of the times that we have to learn constantly. Particularly in the 'Fourth Industrial Revolution', there is a prospect that half of the world's existing jobs will disappear. In this rapidly changing reality, cyber universities are emerging as the center of state-of-the-art education, where they cultivate people who will lead the fourth industrial revolution.

Seoul Digital University, which started as Korea's first cyber university in 2001, has now grown to be the nation's leading cyber university. Seoul Digital University, which has built its know-how and reputation as a prestigious cyber university since its inception, wants to expand your learning opportunities to prepare for the future.

By combining new technologies and education, Seoul Digital University is helping students develop a professional education and a passion for learning beyond age, gender, time, and place. We will meet the demands of the new era through practical training with professionalism, and we will do our best to develop your potential to the fullest.

Seoul Digital University will continue to contribute to society and national development through education. We ask for your continued support and encouragement.

//

Welcome to Seoul Digital University, Korea's leading online university that leads the information society.

//

Hope all is well. I am Kim Jae-hong, the president of Seoul Digital University.

Welcome to Seoul Digital University, which was established in the era of change and globalization in modern society. In the 21st century, the cycle of knowledge and information is getting shorter. In this rapidly changing environment, complacency has become a failure, and without constant learning, it has become difficult to survive within the competition.

Seoul Digital University, the first cyber university established in Korea in 2001, has led the development of online education in Korea. In the meantime, Seoul Digital University has opened new possibilities by challenging and not being afraid of the changing of times. Now, Seoul Digital University is opening up a new history. In the era of the Fourth Industrial Revolution, there is a sense of the need for a new educational paradigm that is completely different from existing education.

Seoul Digital University is a future education system that meets the demands of our era by providing a learner-centered educational environment that goes beyond the constraints of time and place. Our university will serve with a practical and professional curriculum to meet the needs of the times and will serve as a place to satisfy your desire to learn.

Seoul Digital University will continue to play a leading role in the field of online higher education in the world, and it will become the best university worthy of its name to advance beyond Korea into the world.

We will continue to strive to provide the right direction for all of you who chose Seoul Digital University as your future companion.

Thank you.

Seoul Digital University

University President Kim Jae Hong

Why SDU

- Superiority
- Harmony
- Impact
- Network
- Economy

800 Courses

We open wide range of subjects and courses to broaden your choice of study.

// Superiority

- Opened various courses in economics management, language, humanities, social sciences, IT engineering, culture and arts
- Offer a wide range of learning opportunities with over 800 curriculums per year
- Operate classes for obtaining national certificates such as social worker, lifelong education teacher, nursery teacher and culture and art education teacher
- Awarded the Minister Prize of Education for 2 consecutive years
- State-of-the-art content creation infrastructure with Full HD quality, HTML5 coverage, and Virtual Studio

Harmony

We support various student-centered services.

Harmony

Convenient Bachelor's Program centered on Students

- Delay System on Attending Lectures
- Seasonal Courses
- Early Graduation Policy
- Double Major / Miner Studies

Various Student Services

- Student ID / International Student ID
- Certificate issuance in university president's name
- Support clubs and study groups
- Support overseas language training
- Benefits of delaying enlisting
- Unlimited repeatable classes for up to 4 years
- Support MT, Graduation trips, Sport Events & Festivals
- Electronic library (including audiobook)
- Partner Bookstore (Kyobo Bookstore)
- Offer free OA courses (basic/advanced)

Student Support Center

- Class disability consultation center using remote control system
- Psychological counseling center
- Disabled student support center

Attending mobile lectures for all subjects using smart phones

(Smart Learning Construction selected by Ministry of Education & Operation Leading College)

Impact

We are expanding our influences through various activities at home and abroad

Impact

Awarded External Certifications
- No.1 Certification of Personal Information by NIA
- Grand prize on the Most Trusted Brand Awards
- Acquired website certification mark for excellent web accessibility
- Grand prize on premium brand of Korea Brand Awards
- Grand prize of national brand
- Grand prize on Consumer Selected Quality Satisfaction

Knowledge Trend Leader Faculty
- Planned & Operated 'Open Digital Forum' by Seoul city
- Delegated APEC Forum (E-commerce ECSG)

Expanding good influence through social contribution activities
- Supporting facilities with intellectual disabilities
- Conducting blood donating services
- Delivering happiness boxes to elderly people
- Sharing briquettes in poor neighborhoods
- Preparing and sharing Kimchi of Love
- Painting murals

Exchange and cooperation with overseas universities and government institutions such as China, Japan, Vietnam, Morocco, Mongolia and Afghanistan
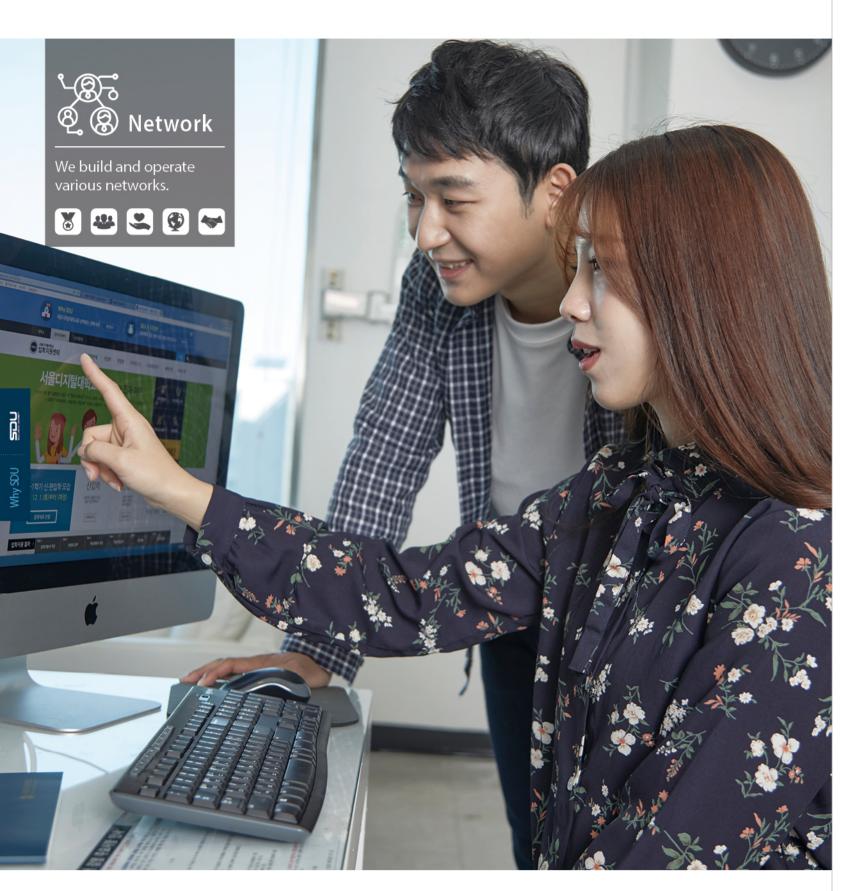

Supported infrastructure construction of 'Cyber University' Established by SoftBank in Japan

We build and operate various networks.

Network

Social Networks

- Cooperation with industries, academia and military
- In alliance with high schools, colleges and graduate schools
- Credit exchange programs with 62 schools in university confederation

Major Industry-Academia Partners of Seoul Digital University

Human Networks

- About 30,550 alumni
- Entered well-known graduate schools in Korea and abroad
- Produced students who passed bar exams, law schools, US Attorney CPA and AICPA

Culture Networks

- Operating 'SDU Art Prize'
- Supporting publication of 'Literature Today'
- Seoul Digital University Gallery
- Operating soccer team
- Regularly holding JAM concerts
- Music production

We have reasonable tuition fees and operate a generous scholarship program

Economy

Reasonable Tuition
- Fulfilling half-price tuitions
- 1.08 million KRW per semester

Comparison of 1st Semester Tuition
(18 credits/ Unit : Ten thousand KRW)

Seoul Digital Uni.

Electric and Electronic Engineering

Place to realize the dream of The 4th Industrial Revolution

Department Introduction
- Electrical and electronic engineering, which is the core technology of new and infinite growth opportunities in the era of digital industrial revolution
- Possible to acquire the latest expertise and skills in electric and electronic key technologies
- Fostering professional engineers who can develop green energy, fire-fighting electricity, and semiconductor related technology

Department Pride
Practice-oriented faculty, combining the latest power, energy, semiconductor and communication technologies with optimum curriculum, Providing the best human networks related to electrical and electronic.

Career Path after Graduation
Life-long education program management, course advising, learning programs evaluation, youth guidance program management, corporate education program planning, designing e-learning content, etc.
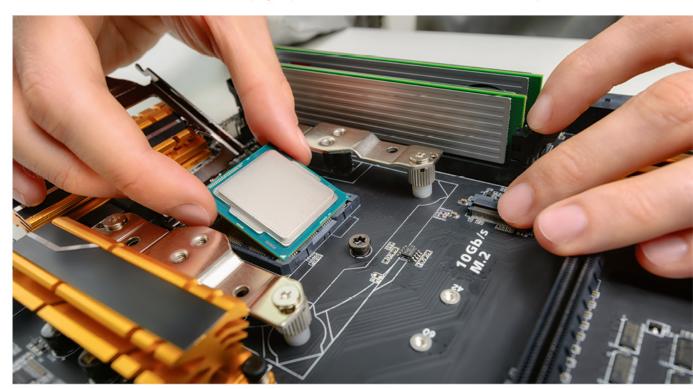

Representative Courses
- Electric power and energy system specialist - Electrical equipment, Electromagnetics, Power engineering, Circuit theory and control engineering, T & D engineering
- Semiconductor & Telecom Experts - Physical Electronics, Electronic Circuits, Electronic Circuit Design, Information Transmission Engineering
- Electric and Electronics Convergence Experts - Digital Electronic Circuits, Understanding and Operation of Drones, Robo-Engineering, Cloud Computing, IT Convergence Technology

Obtainable Certificates
- Electrician, electric engineer, renewable energy generating engineer, energy manager, fire engineer
- Electronics operator, information and communication operator, semiconductor design operator, broadcasting and communication operator, etc.
- Electronic calculation control operator, electronic calculator application operator, electronic calculation operator, information processing operator, information security operator, etc.

Inquiry | Department office ☎ 02.2128.3290 | E-mail ee@sdu.ac.kr | Department website ee.sdu.ac.kr

Computer Engineering

A community of ICT experts for the 21st century

Department Introduction
- An in-depth education in computer engineering principles based on fundamental theories and techniques for practical applications to real world problems
- A convergence of several established technologies such as the Internet of Things, big data, cloud computing, and mobile technologies

Department Pride
- A strong foundation for advanced coursework in four specialized fields: Information Security, Mobile App Development, Computer Programming Education, and Spatial Information

Career Path after Graduation
Large multinational firms and small startups, public institutions, computer companies, software companies, multimedia companies, internet service companies, network companies, educational facilities, research institution, etc.

Representative Courses
Microsoft Certified Systems Engineer (MCSE), Cisco Certified Network Associate (CCNA), Certified Information Systems Auditor(CISA), Certified Information Systems Security Professional (CISSP), Project Management Professional (PMP), Introduction to App Development, Mobile Application Development, Introduction to Information Subject Education, Programming Language Education, Introduction to Spatial Information

Obtainable Certificates
Microsoft, CISCO, ORACLE, PMI, etc

Software Convergence Technology

Software convergence technology: the key growth driver of the 21st century

Department Introduction
- Learn software convergence technology that is essential in many IT convergence industries such as the computer software, digital contents, robotics, automotive, healthcare, environmental, energy, and medical devices industries
- Training professional technicians with the ability to develop digital contents as well as applications for computers and mobile devices

Department Pride
- The only software convergence technology department among online universities in Korea
- Providing a virtual lab environment based on cloud computing technology

Career Path after Graduation
Computer program developer, computer system operator, mobile application developer, mobile service system operator, digital content planner, digital content developer, database administrator, etc.

Representative Courses
Introduction to Software Convergence, Software Analysis and Design, Embedded System, Object-oriented Programming, Game Engine (Unity), etc.

Obtainable Certificates
Engineer Information Processing, Engineer Computer System Application, Specialist-Multimedia Contents Producing, Software Asset Manager, SQLP (SQL Professional), SQLD (SQL Developer), DA (Data Architecture), DAP (Data Analytics Professional), etc.

Get ready to challenge with LED
Living Environment Design

Department Introduction
• The latest digital technology education for various visualization-based designs
• Systematic visual design theory and practical course
• Training creative visual designers through 'creative thinking and planning process'
• Curriculum of the latest trends required in design field
• Teaching professors working in design industry optimized for online environment

Department Pride
- Curriculum reflecting customized level & latest design trends for students
- Design field professors with experiences and theory
- Practical design classes
- High graduate school enrollment rate
- Possible for maximum networking with design experts

Career Path after Graduation
Digital publishing, digital contents design, web / mobile contents design, 3D printing design, design planning / management, design education, design startup, enroll graduate school, etc.

Representative Courses
Digital publishing, 3D printing design, design startup business, design planning and concept, infographic design, digital branding

Obtainable Certificates
• Certificates : 2nd level cultural arts education (design), visual design engineer, computer graphics operation technician, colorist Web design specialist, electronic publishing specialist, product modeling specialist, product design expert • Industrial engineer • Professional engineer, multimedia specialist 1st grade • 2nd grade
• Diploma : Digital Publishing Specialization Diploma, 3D Printing Design Specialization Diploma, Design Management Specialization Diploma, Design Creative Education Specialization Diploma

Convergence Course Introduction

4th Industrial Revolution Convergence Course

Seoul Digital University's 4th Industry Convergence Course is a multi-major convergence course that was launched in 2019 to foster creative and innovative future talents for the rapidly changing digital age of industrial structural transformations, the arrival of IT and smart revolution, and the acceleration of global integration.
Students strengthen the practical expertise to lead the future age and foster creative problem-solving skills by convergence and consensus among disciplines by freely combining their major subjects beyond the academic limit of a single department. We develop a variety of business models and cultivate professionals to create innovative IT convergence contents that are fused with humanities-based imagination, storytelling, and advanced technology.

	Number of credits		
	12 credits	15 credits	18 credits
Tuition	720,000 won	900,000 won	1,080,000 won

Admissions FAQ

Seoul Digital University was established in 2001 as a 4-year online university with 24 majors. Graduates receive a bachelor's degree and qualify to go on to graduate schools or get employed in and outside the country. SDU has the most graduates of all online universities in Korea.

Q. Is Seoul Digital University a university accredited by the Ministry of Education?

Seoul Digital University is a four-year full-time online university under the Higher Education Act established in 2001. Graduates of 24 departments (majors) are awarded a bachelor's degree in the name of the university president and can enter well-known graduate schools in Korea and abroad, get a job, and obtain a national certificates.

Q. What is the difference between SDU and regular universities?

All of our classes and exams are done online, so you don't have to be physically present in the classroom. As a result, a lot of public officials and workers take classes at SDU because they can maintain a job and study at the same time. Furthermore, tuition at SDU is about one-fourth the cost of other universities.

Q. Who goes to SDU?

We have a wide variety of students ranging from recent high school graduates to people who are over 50s; the majority of students are in their 20s to 40s. People who live outside Korea take classes through us as well. Recently, the number of technical college graduates and workers with high school diplomas has been increasing.

Q. How do I take classes and exams?

We have two semesters each year, and classes and exams are all done online. You can also use a smartphone to take classes and review lectures for up to four years after you have completed them. We don't have mid-term exams, just finals. Tests consist of multiple-choice and essay questions.

Q. How is the grading evaluation done?

The grades are given by various evaluation items such as lecture attendance, academic attitude, assignments, quizzes, and final exams for each subject. The evaluation rate varies depending on the course, but over 70% of the students are receiving scores of 2.0 or higher.

Q. How do I get more information on admissions?

You can sign up for more information on our admissions website at go.sdu.ac.kr. We send out souvenirs and admissions brochures by mail.
